Volume 217 1993

Table of contents

No. 1 1– 492 issued on October 1, 1993
No. 2 493– 798 issued on October 15, 1993
No. 3 799–1138 issued on November 1, 1993

Correction 1129

Information for authors 1131–1137

Contents of Volume 217 I–XIII

Nucleic acids, protein synthesis and molecular genetics

Cloning from a mouse osteoblastic cell line of a set of transforming-growth-factor-β1-regulated genes, one of which seems to encode a follistatin-related polypeptide
Motoko Shibanuma, Jun'ichi Mashimo, Akira Mita, Toshio Kuroki, Kiyoshi Nose 13–19

Aberrant proteolysis of the β-amyloid precursor protein in familial Alzheimer's disease lymphoblastoid cells
Akira Matsumoto, Yoshisada Fujiwara 21–27

Identification of important bases in a single-stranded region (SSrC) of the hepatitis delta (δ) virus ribozyme
Junji Kawakami, P. K. R. Kumar, Young-Ah Suh, Fumiko Nishikawa, Keiko Kawakami, Kazunari Taira, Eiko Ohtsuka, Satoshi Nishikawa 29–36

Gene sequence, cDNA construction, expression in *Escherichia coli* and genetically approached purification of porcine interleukin-1β
Koen Vandenbroeck, Pierre Fiten, Erik Beuken, Erik Martens, Ann Janssen, Jo Van Damme, Ghislain Opdenakker, Alfons Billiau 45–52

Gly85 to Val substitution in proα1(I) chain causes mild osteogenesis imperfecta and introduces a susceptibility to protease digestion
Maurizia Valli, Francesca Zolezzi, Monica Mottes, Franco Antoniazzi, Franco Stanzial, Ruggero Tenni, PierFranco Pignatti, Giuseppe Cetta 77–82

Sorbitol dehydrogenase – Full-length cDNA sequencing reveals a mRNA coding for a protein containing an additional 42 amino acids at the N-terminal end
Yi Wen, Isaac Bekhor 83–87

In vitro binding of nuclear proteins to the barley plastocyanin gene promoter region
Peter S. Nielsen, Kirsten Gausing 97–104

Cloning, DNA sequence analysis and partial characterization of *pepN*, a lysyl aminopeptidase from *Lactobacillus delbrückii* ssp. *lactis* DSM7290
Jürgen Robert Klein, Ulrike Klein, Michael Schad, Roland Plapp 105–114

Cloning, sequencing and immunological characterization of the corrinoid-containing subunit of the N^5-methyltetrahydromethanopterin: coenzyme-M methyltransferase from *Methanobacterium thermoautotrophicum*
Erhard Stupperich, Andreas Juza, Michael Hoppert, Frank Mayer 115–121

The mannose-specific lectins from ramsons (*Allium ursinum* L.) are encoded by three sets of genes
Els J. M. Van Damme, Koen Smeets, Sophie Torrekens, Fred Van Leuven, Willy J. Peumans 123–129

Nuclear magnetic resonance study of the codon-anticodon interaction in *Bombyx mori* $tRNA^{Gly}_{GCC}$
Mayumi Amano , Yoshimasa Kyogoku 131–136

Post-transcriptional and post-translational regulatory steps are crucial in controlling the appearance and stability of thylakoid polypeptides during the transition of etiolated tobacco seedlings to white light
Rosario Palomares, Reinhold G. Herrmann, Ralf Oelmüller 345–352

Differential regulation of the human H1°-histone-gene transcription in human tumor-cell lines
Hakim L. Bouterfa, Suzane M. Triebe, Detlef R. Doenecke 353–360

Immunoelectron microscopic localization of ribosomal proteins BS8, BS9, BS20, BL3 and BL21 on the surface of 30S and 50S subunits from *Bacillus stearothermophilus*
Gerda Schwedler, Renate Albrecht-Ehrlich, Karl-Heinz Rak 361–369

Interactions of chloroaluminium-tetramethyl-tetrapyridino-porphyrazine with DNA
Tsoetan G. Gantchev, Hasrat Ali, Johan E. van Lier 371–376

Glycine decarboxylase complex from higher plants – Molecular cloning, tissue distribution and mass spectrometry analyses of the T protein
Jacques Bourguignon, Pierre Vauclare, Véronique Merand, Eric Forest, Michel Neuburger, Roland Douce 377–386

A mutant T7 phage promoter is specifically transcribed by T7-RNA polymerase in mammalian cells
Andre Lieber, Volker Sandig, Michael Strauss 387–394

Proof-reading 3′→5′ exonucleases isolated from rat liver nuclei
Natalya V. Belyakova, Natalya E. Kleiner, Tatyana P. Kravetskaya, Olga K. Legina, Stanislav N. Naryzhny, Fred W. Perrino, Igor V. Shevelev, Valery M. Krutyakov 493–500

Identification of a 100-kDa protein associated with nuclear ribonuclease P activity in *Schizosaccharomyces pombe*
Steven Zimmerly, Denis Drainas, Lee A. Sylvers, Dieter Söll 501–507

Different organization of the tRNA-gene-associated repetitive element, DRE, in NC4-derived strains and in other wild-type *Dictyostelium discoideum* strains
Rolf Marschalek, Jörg Hofmann, Gerald Schumann, Martina Bach, Theodor Dingermann 627–631

Transcriptional control of the heme oxygenase gene during mouse spermatogenesis
Shun-ichi Kurata, Midori Matsumoto, Motonori Hoshi, Hiroshi Nakajima 633–638

Putative dehydrogenase tms1 suppresses growth arrest induced by a p53 tumour mutant in fission yeast
Peter Wagner, Margaret Grimaldi, John R. Jenkins 731–736

Broad binding-site specificity and affinity properties of octamer 1 and brain octamer-binding proteins
Andrew J. Bendall, Richard A. Sturm, Patrick A. C. Danoy, Peter L. Molloy 799–811

The promoter region of the human type-I-DNA-topoisomerase gene – Protein-binding sites and sequences involved in transcriptional regulation
Susanne Heiland, Rolf Knippers, Norbert Kunze 813–822

Characterization and purification of the solubilized pituitary adenylate-cyclase-activating polypeptide-1 receptor from porcine brain using a biotinylated ligand
Heiner Schäfer, Wolfgang E. Schmidt 823–830

Higher plant mitochondria encode an homologue of the nuclear-encoded 30-kDa subunit of bovine mitochondrial complex I
Lorenzo Lamattina, Daniel Gonzalez, José Gualberto, Jean-Michel Grienenberger 831–838

Reconstruction of translation – Evidence for the involvement of the rescue protein in the association/dissociation of ribosomal subunits
M. Clelia Ganoza, Hiroyuki Aoki, Ivona Kozieradzki, Ira Schwartz 839–847

The putative zinc-finger protein WZF1 interacts with a *cis*-acting element of wheat histone genes
Ayako Sakamoto, Maki Minami, Gyung Hye Huh, Masaki Iwabuchi 1049–1056

A new brain-specific 14-kDa protein is a phosphoprotein – Its complete amino acid sequence and evidence for phosphorylation
Shigeo Nakajo, Kazuhiko Tsukada, Kumiko Omata, Yasuharu Nakamura, Kazuyasu Nakaya 1057–1063

Isolation and characterization of cDNAs from Atlantic cod encoding two different forms of trypsinogen
Ágústa Gudmundsdóttir, Elín Gudmundsdóttir, Skarphédinn Óskarsson, Jón B. Bjarnason, Ann K. Eakin, Charles S. Craik 1091–1097

Expression of human cytochrome *c* oxidase subunits during fetal development
Gisèle Bonne, Peter Seibel, Stefanie Possekel, Cécile Marsac, Bernhard Kadenbach 1099–1107

Protein chemistry and structure

Specific covalent modification of the tryptophan residues in murine interleukin-6 – Effect on biological activity and conformational stability
Jian-Guo Zhang, Gavin E. Reid, Robert L. Moritz, Larry D. Ward, Richard J. Simpson 53–59

Activation of porcine pepsinogen A – The stability of two non-covalent activation intermediates at pH 8.5
F. Stausholm Nielsen, Bent Foltmann 137–142

Further characterization of structural and electric properties of non-spherical α-crystallin
Bart van Haeringen, Marco R. van den Bogaerde, Don Eden, Rienk van Grondelle, Michael Bloemendal 143–150

Amino acid sequence of the small cadmium-binding protein (MP II) from *Nereis diversicolor* (*annelida*, polychaeta) – Evidence for a myohemerythrin structure
Sylvain Demuynck, Ka Wan Li, Roel Van der Schors, Nicole Dhainaut-Courtois 151–156

Synthesis of charybdotoxin and of two N-terminal truncated analogues – Structural and functional characterisation
Claudio Vita, François Bontems, Françoise Bouet, Michel Tauc, Philippe Poujeol, Hossein Vatanpour, Alan L. Harvey, André Menez, Flavio Toma 157–169

Conformational study of a short *Pertussis* toxin T cell epitope incorporated in a multiple antigen peptide template by CD and two-dimensional NMR – Analysis of the structural effects on the activity of synthetic immunogens
Gennaro Esposito, Federico Fogolari, Paolo Viglino, Serge Cattarinussi, Maria Teresa De Magistris, Lorella Chiappinelli, Antonello Pessi 171–187

Cloning, site-specific mutagenesis, expression and characterization of full-length chloroplast NADP-malate dehydrogenase from *Pisum sativum*
Winfried Reng, Robin Riessland, Renate Scheibe, Rainer Jaenicke 189–197

Intracellular and extracellular processing of chromogranin A – Determination of cleavage sites
Marie-Hélène Metz-Boutigue, Pascale Garcia-Sablone, Ruth Hogue-Angeletti, Dominique Aunis 247–257

Combined plasma-desorption mass spectrometry and Edman degradation applied to simultaneous sequence determination of isoforms of structural proteins from the cuticle of *Locusta migratoria*
Lea Andreasen, Peter Højrup, Svend O. Andersen, Peter Roepstorff 267–273

Calcium binding to sialic acids and its effect on the conformation of ependymins
Bernhard Ganß, Werner Hoffmann 275–280

Determination of relative binding affinity of influenza virus N9 sialidases with the Fab fragment of monoclonal antibody NC41 using biosensor technology
L. Clem Gruen, Alexander A. Kortt, Edouard Nice 319–325

Roulette mutagenesis of the FMN-binding site of *Klebsiella pneumoniae* flavodoxin
Martin Drummond, Susan Huff, Andrew Green 395–400

The amino acid sequence of human ribonuclease 4, a highly conserved ribonuclease that cleaves specifically on the 3′ side of uridine
Hai-Meng Zhou, Daniel J. Strydom 401–410

Specific molecular interaction sites on factor VII involved in factor X activation
Anuradha Kumar, Daryl S. Fair 509–518

Primary structure of a porcine leukocyte serpin
Winfried F. Teschauer, Reinhart Mentele, Christian P. Sommerhoff 519–526

Limited proteolysis of yeast phosphofructokinase – Sequence locations of cleavage sites created by the actions of different proteinases
Gerhard Kopperschläger, Jörg Bär, Earle Stellwagen 527–533

Molecular cloning and primary structure of Man_9-mannosidase from human kidney
Ernst Bause, Erhard Bieberich, Andreas Rolfs, Christof Völker, Bernhard Schmidt 535–540

Solution conformation of an antibacterial peptide, sarcotoxin IA, as determined by ^{1}H-NMR
Hideo Iwai, Yuki Nakajima, Shunji Natori, Yoji Arata, Ichio Shimada 639–644

Aggregation of pyrene-labeled microsomal glutathione *S*-transferase – Effect of concentration
Fiorella Piemonte, Anna M. Caccuri, Ralf Morgenstern, Nicola Rosato, Giorgio Federici 661–663

Accessibility to modification of histidine residues of RecA protein upon DNA and cofactor binding
Masayuki Takahashi, Bengt Nordén 665–670

Intramolecular distances within the Ca^{2+}-ATPase from sarcoplasmic reticulum as estimated through fluorescence energy transfer between probes
Senena Corbalan-Garcia, José A. Teruel, Juan C. Gomez-Fernandez 737–744

Conformations and conformational changes of four Phe→Trp variants of the DNA-binding histone-like protein, HBsu, from *Bacillus subtilis* studied by circular dichroism and fluorescence spectroscopy
Heinz Welfle, Rolf Misselwitz, Karin Welfle, Hermann Schindelin, Andreas S. Scholtz, Udo Heinemann 849–856

Molecular cloning, expression and functional characterization of rabbit anticoagulant vitamin-K-dependent protein S
Xuhua He, Björn Dahlbäck 857–865

Cloning of a new antenna gene cluster and expression analysis of the antenna gene family of *Rhodopseudomonas palustris*
Monier H. Tadros, Eleni Katsiou, Mark A. Hoon, Natalie Yurkova, Dipak P. Ramji 867–875

Sites of nidogen cleavage by proteases involved in tissue homeostasis and remodelling
Ulrike Mayer, Karlheinz Mann, Rupert Timpl, Gillian Murphy 877–884

Four 9-kDa proteins excreted by somatic embryos of grapevine are isoforms of lipid-transfer proteins
Pierre Coutos-Thevenot, Thierry Jouenne, Olivier Maes, Françoise Guerbette, Michèle Grosbois, Jean Pierre Le Caer, Michel Boulay, Alain Deloire, Jean Claude Kader, Jean Guern 885–889

Disulfide interchange reactions in 11S globulin subunits of *Cruciferae* seeds – Relationships to gene families
Valérie Inquello, Jacques Raymond, Jean Louis Azanza 891–895

Isolation, structural characterization and biological function of a lysine-conopressin in the central nervous system of the Pharyngobdellid leech *Erpobdella octoculata*
Michel Salzet, Philippe Bulet, Alain Van Dorsselaer, Jean Malecha 897–903

Structural requirements for processing of pro-adipokinetic hormone I
Richard C. Rayne, Michael O'Shea 905–911

Expression of human interferon ω1 in Sf9 cells – No evidence for complex-type N-linked glycosylation or sialylation
Tilman Voss, Erkan Ergülen, Horst Ahorn, Viktoria Kubelka, Kenji Sugiyama, Ingrid Maurer-Fogy, Josef Glössl 913–919

Expression of human interferon-α2 in Sf9 cells – Characterization of O-linked glycosylation and protein heterogeneities
Kenji Sugyiama, Horst Ahorn, Ingrid Maurer-Fogy, Tilman Voss 921–927

Enzymology

Interactions between active-site serine β-lactamases and so-called β-lactamase-stable antibiotics – Kinetic and molecular modelling studies
André Matagne , Josette Lamotte-Brasseur , Jean-Marie Frère 61–67

Heterogeneity of glycosylphosphatidylinositol-anchored alkaline phosphatase of calf intestine
Renate Bublitz, Julio Armesto, Eva Hoffmann-Blume, Margarete Schulze, Heidrun Rhode, Anton Horn, Steffen Aulwurm, Ewald Hannappel, Werner Fischer 199–207

Side-chain specificities of human and bovine cytochromes *P*-450$_{scc}$
Robert C. Tuckey, Kathryn J. Cameron 209–215

Probing the role of metal ions in the mechanism of inositol monophosphatase by site-directed mutagenesis
Scott J. Pollack, Michael R. Knowles, John R. Atack, Howard B. Broughton, C. Ian Ragan, SallyAnn Osborne, George McAllister 281–287

Amidase coupled with low-molecular-mass nitrile hydratase from *Rhodococcus rhodochrous* J1 – Sequencing and expression of the gene and purification and characterization of the gene product
Michihiko Kobayashi, Hidenobu Komeda, Toru Nagasawa, Makoto Nishiyama, Sueharu Horinouchi, Teruhiko Beppu, Hideaki Yamada, Sakayu Shimizu 327–336

Catalytic and binding properties of restriction endonuclease *Cfr*9I
Virginius Siksnys, Milda Pleckaityte 411–419

Identification and characterization of a soluble form of the plasma cell membrane glycoprotein PC-1 (5′-nucleotide phosphodiesterase)
Sabina I. Belli, Ian R. van Driel, James W. Goding 421–428

Cloning, expression and mutational analysis of the urocanase gene (*hutU*) from *Pseudomonas putida*
Martin Lenz, János Rétey 429–434

Tyrosinase isoenzymes in mammalian melanocytes – 2. Differential activation by α-melanocyte-stimulating hormone
Paloma Valverde, Jose C. Garcia-Borron, Celia Jimenez-Cervantes, Francisco Solano, Jose A. Lozano 541–548

Tyrosinase isoenzymes in mammalian melanocytes – 1. Biochemical characterization of two melanosomal tyrosinases from B16 mouse melanoma
Celia Jimenez-Cervantes, Jose Carlos Garcia-Borron, Paloma Valverde, Francisco Solano, Jose A. Lozano 549–556

Purification and characterization of endoglucanase C from *Clostridium cellulolyticum* – Catalytic comparison with endoglucanase A
Henri-Pierre Fierobe, Chantal Bagnara-Tardif, Christian Gaudin, Françoise Guerlesquin, Paul Sauve, Anne Belaich, Jean-Pierre Belaich 557–565

Activity and spectroscopic properties of bovine liver catalase in sodium bis(2-ethylhexyl)sulfosuccinate/isooctane reverse micelles
J. Haber, P. Maślakiewicz, J. Rodakiewicz-Nowak, P. Walde 567–573

Purification, nucleotide sequence and some properties of a bifunctional isomerase/decarboxylase from the homoprotocatechuate degradative pathway of *Escherichia coli* C
David I. Roper, Ronald A. Cooper 575–580

Structural flexibility of the calmodulin-binding locus in *Bordetella pertussis* adenylate cyclase – Reconstitution of catalytically active species from fragments or inactive forms of the enzyme
Hélène Munier, Ahmed Bouhss, Anne-Marie Gilles, Evelyne Krin, Philippe Glaser, Antoine Danchin, Octavian Bârzu 581–586

Properties of the two isoenzymes of methyl-coenzyme M reductase in *Methanobacterium thermoautotrophicum*
Lutz G. Bonacker, Siegfried Baudner, Erhard Mörschel, Reinhard Böcher, Rudolf K. Thauer 587–595

Increased levels of alpha-class and pi-class glutathione *S*-transferases in cell lines resistant to 1-chloro-2,4-dinitrobenzene
Clare J. Wareing, Stephen M. Black, John D. Hayes, C. Roland Wolf 671–676

Molecular characterization of flavanone 3β-hydroxylases – Consensus sequence, comparison with related enzymes and the role of conserved histidine residues
Lothar Britsch, Jürgen Dedio, Heinz Saedler, Gert Forkmann 745–754

Steady-state kinetics of substrate hydrolysis by vacuolar H^+-pyrophosphatase – A simple three-state model
Alexander A. Baykov, Natalia P. Bakuleva, Philip A. Rea 755–762

Purification of the large mobilization protein of plasmid RSF1010 and characterization of its site-specific DNA-cleaving/DNA-joining activity
Eberhard Scherzinger, Volker Kruft, Sabine Otto 929–938

Site-directed mutagenesis of β-lactamase TEM-1 – Investigating the potential role of specific residues on the activity of *Pseudomonas*-specific enzymes
Françoise Lenfant, Agnès Petit, Roger Labia, Laurent Maveyraud, Jean-Pierre Samama, Jean-Michel Masson 939–946

Stereochemistry, specificity and kinetics of the hydrolysis of reduced cellodextrins by nine cellulases
Charlotte Schou, Grethe Rasmussen, Maj-Britt Kaltoft, Bernard Henrissat, Martin Schülein 947–953

The second nucleophile molecule binds to the acyl-enzyme–nucleophile complex in α-chymotrypsin catalysis – Kinetic evidence for the interaction
Mikhail Y. Gololobov, Valentin M. Stepanov, Tatjana L. Voyushina, Patrick Adlercreutz 955–963

Proteolytic cleavage of synthetic fragments of vesicle-associated membrane protein, isoform-2 by botulinum type B neurotoxin
Clifford C. Shone, Conrad P. Quinn, Robin Wait, Bassam Hallis, Sarah G. Fooks, Peter Hambleton 965–971

Dihydrorhodamine 123: a fluorescent probe for superoxide generation?
Lydia M. Henderson, J. Brian Chappell 973–980

Structural and functional properties of a multi-enzyme complex from spinach chloroplasts – 1. Stoichiometry of the polypeptide chains
Magali Rault, Marie-Thérèse Giudici-Orticoni, Brigitte Gontero, Jacques Ricard 1065–1073

Structural and functional properties of a multi-enzyme complex from spinach chloroplasts – 2. Modulation of the kinetic properties of enzymes in the aggregated state
Brigitte Gontero, Guillermo Mulliert, Magali Rault, Marie-Thérèse Giudici-Orticoni, Jacques Ricard 1075–1082

Mutational analysis of phospholipase C-β_2 – Identification of regions required for membrane association and stimulation by guanine-nucleotide-binding protein $\beta\gamma$ subunits
Petra Schnabel, Montserrat Camps, Amanda Carozzi, Peter J. Parker, Peter Gierschik 1109–1115

Carbohydrates, lipids and other natural products

Structural study of a cell-wall mannan of *Saccharomyces kluyveri* IFO 1685 strain – Presence of a branched side chain and β-1,2-linkage
Nobuyuki Shibata, Chizuko Kojima, Yohko Satoh, Richi Satoh, Atsuko Suzuki, Hidemitsu Kobayashi, Shigeo Suzuki 1–12

Abduction of iron(III) from the soluble methane monooxygenase hydroxylase and reconstitution of the binuclear site with iron and manganese
Mohamed Atta, Marc Fontecave, Patricia C. Wilkins, Howard Dalton 217–223

The glycosylphosphatidylinositol anchor of the trypomastigote-specific Tc-85 glycoprotein from *Trypanosoma cruzi* – Metabolic-labeling and structural studies
Alicia S. Couto, Rosa M. de Lederkremer, Walter Colli, M. Julia M. Alves 597–602

Monoclonal antibodies directed against *Leishmania* secreted acid phosphatase and lipophosphoglycan – Partial characterization of private and public epitopes
Thomas Ilg, Dorothee Harbecke, Martin Wiese, Peter Overath 603–615

Core-typing of O-linked glycans from human gastric mucins – Lack of evidence for the occurrence of the core sequence Gal1-6GalNAc
Franz-Georg Hanisch, Wengang Chai, Jerzy R. Rosankiewicz, Alexander M. Lawson, Mark S. Stoll, Ten Feizi 645–655

The α-mannosyl-binding lectin from leaves of the orchid twayblade (*Listera ovata*) – Application to separation of α-D-mannans from α-D-glucans
Keiko Saito, Akiko Komae, Mariko Kakuta, Els J. M. van Damme, Willy J. Peumans, Irwin J. Goldstein, Akira Misaki 677–681

Voltammetric studies of the catalytic electron-transfer process between the *Desulfovibrio gigas* hydrogenase and small proteins isolated from the same genus
Cristina Moreno, Ricardo Franco, Isabel Moura, Jean Le Gall, José J. G. Moura 981–989

Catalytic mechanism of 3-deoxy-D-*manno*-2-octulosonate-8-phosphate synthase – The use of synthetic analogues to probe the structure of the putative reaction intermediate
Timor Baasov, Shani Sheffer-Dee-Noor, Amnon Kohen, Abla Jakob, Valery Belakhov 991–999

Biosynthesis of vitamin B12 in anaerobic bacteria – Transformation of 5-hydroxybenzimidazole and 5-hydroxy-6-methylbenzimidazole into 5,6-dimethylbenzimidazole in *Eubacterium limosum*
Paul Renz, Birgit Endres, Birgit Kurz, Jörg Marquart 1117–1121

Membranes and bioenergetics

Localization of a putative magnesium-binding site within the cytoplasmic domain of the sarcoplasmic reticulum Ca^{2+}-ATPase
Jean-Luc Girardet, Isabelle Bally, Gérard Arlaud, Yves Dupont 225–231

Hydrogen formation from glycolate driven by reversed electron transport in membrane vesicles of a syntrophic glycolate-oxidizing bacterium
Michael Friedrich, Bernhard Schink 233–240

Complement fragment C3a stimulates Ca^{2+} influx in neutrophils via a pertussis-toxin-sensitive G protein
Johannes Norgauer, Gustav Dobos, Eckhard Kownatzki, Clemens Dahinden, Reinhard Burger, Roland Kupper, Peter Gierschik 289–294

Stimulatory effect of NH_4^+ on the transport of leucine and glucose in an anaerobic alkaliphile
Noriyuki Koyama 435–439

The ratio of protons translocated/hydride ion equivalent transferred by nicotinamide nucleotide transhydrogenase in chromatophores from *Rhodospirillum rubrum*
Tania Bizouarn, J. Baz Jackson 763–770

Comparison of X-ray powder-diffraction data of various bacterial lipopolysaccharide structures with theoretical model conformations
Manfred Kastowsky, Thomas Gutberlet, Hans Bradaczek 771–779

Fusion of artificial membranes with mammalian spermatozoa – Specific involvement of the equatorial segment after acrosome reaction
Eugène G. J. M. Arts, Jaap Kuiken, Siemen Jager, Dick Hoekstra 1001–1009

Thermodynamics of the maleate and citraconate hydration reactions catalysed by malease from *Pseudomonas pseudoalcaligenes*
Mariët J. van der Werf, Will J. J. van den Tweel, Sybe Hartmans 1011–1017

Characterization of the KdpD protein, the sensor kinase of the K^+-translocating Kdp system of *Escherichia coli*
Petra Voelkner, Wolfram Puppe, Karlheinz Altendorf 1019–1026

Pseudomonas aeruginosa cytotoxin-binding protein in rabbit erythrocyte membranes – An oligomer of 28 kDa with similarity to transmembrane channel proteins
Frieder Lutz, Manuela Mohr, Magdalene Grimmig, Regina Leidolf, Dietmar Linder 1123–1128

Molecular cell biology and metabolism

Molecular cloning of a cDNA encoding an inducible calmodulin-dependent nitric-oxide synthase from rat liver and its expression in COS 1 cells
Hiroko Adachi, Sachio Iida, Shinobu Oguchi, Hiroshi Ohshima, Hisanori Suzuki, Koichi Nagasaki, Hiroshi Kawasaki, Takashi Sugimura, Hiroyasu Esumi 37–43

A role for protein kinase C-α in zymosan-stimulated eicosanoid synthesis in mouse peritoneal macrophages
Andrea Huwiler, Josef Pfeilschifter 69–75

Correlation between the inhibition of cell growth by accumulated polyamines and the decrease of magnesium and ATP
Yong He, Keiko Kashiwagi, Junichi Fukuchi, Kiyoshi Terao, Akira Shirahata, Kazuei Igarashi 89–96

Isolation and characterization of three cDNAs coding for Rab proteins from the albumen gland of the mollusc *Lymnaea stagnalis*
Marja Agterberg, Irma van Die, Hui Yang, J. Aino Andriessen, Angelique van Tetering, Dirk H. van den Eijnden, Hidde L. Ploegh 241–246

Regulation of neurosecretory habituation by cAMP – Role of adaptation of cAMP signals
Paul T. Martin, Ben Tsu-Ping Chung, Daniel E. Koshland Jr. 259–265

Aortic smooth muscle contains guanylate-cyclase-coupled 130-kDa atrial natriuretic factor receptor as predominant receptor form – Spontaneous switching to 60-kDa C-receptor upon cell culturing
Tetsuaki Abe, Kozo Nishiyama, Rudolf Snajdar, Xiaolan He, Kunio S. Misono 295–304

Inhibition by the protein kinase C activator 4β-phorbol 12-myristate 13-acetate of the prostaglandin $F_{2\alpha}$-mediated and noradrenaline-mediated but not glucagon-mediated activation of glycogenolysis in rat liver
Gerhard P. Püschel, Hisayuki Miura, Frank Neuschäfer-Rube, Kurt Jungermann 305–311

Third isoform of the prostaglandin-E-receptor EP_3 subtype with different C-terminal tail coupling to both stimulation and inhibition of adenylate cyclase
Atsushi Irie, Yukihiko Sugimoto, Tsunehisa Namba, Akira Harazono, Akiko Honda, Akiko Watabe, Manabu Negishi, Shuh Narumiya, Atsushi Ichikawa 313–318

Effect of hydrostatic pressure and cholesterol depletion on the expression of a tumor-associated antigen
Nicla Gesmundo, Natalia Calonghi, Giorgio Sartor, Giovanna Farruggia, Silvia Miotti, Silvana Canevari, M. Ines Colnaghi, Lanfranco Masotti 337–343

Role of the *rac*1 p21-GDP dissociation inhibitor for *rho* heterodimer in the activation of the superoxide-forming NADPH oxidase of macrophages
Edgar Pick, Yara Gorzalczany, Sharon Engel 441–455

Metabolic flux determination in C6 glioma cells using carbon-13 distribution upon [1-^{13}C]glucose incubation
Jean-Charles Portais, Ronny Schuster, Michel Merle, Paul Canioni 457–468

The role of the NAD-dependent glutamate dehydrogenase in restoring growth on glucose of a *Saccharomyces cerevisiae* phosphoglucose isomerase mutant
Eckhard Boles, Wolfgang Lehnert, Friedrich K. Zimmermann 77

Biotin biosynthesis in higher plant cells – Identification of intermediates
Pierre Baldet, Heidrun Gerbling, Stella Axiotis, Roland Douce 479–485

TKL2, a second transketolase gene of *Saccharomyces cerevisiae* – Cloning, sequence and deletion analysis of the gene
Ine Schaaff-Gerstenschläger, Gertrud Mannhaupt, Irene Vetter, Friedrich K. Zimmermann, Horst Feldmann 487–492

[1-^{13}C]Glucose metabolism in rat cerebellar granule cells and astrocytes in primary culture – Evaluation of flux parameters by ^{13}C- and ^{1}H-NMR spectroscopy
Magali Martin, Jean-Charles Portais, Julie Labouesse, Paul Canioni, Michel Merle 617–625

Interactions of calcium and magnesium with the mitochondrial inorganic pyrophosphatase from *Saccharomyces cerevisiae*
Salvador Uribe, Pablo Rangel, Juan Pablo Pardo, Lucia Pereira-da-Silva 657–660

Repression of histone gene transcription in quiescent 3T6 fibroblasts
Peter Zahradka, Tracy Elliot, Kenneth Hovland, Dawn E. Larson, Laura Saward 683–690

3-Hydroxy-3-methylglutaryl-coenzyme-A synthase from *Blattella germanica* – Cloning, expression, developmental pattern and tissue expression
José Martínez-González, Carlos Buesa, María-Dolos Piulachs, Xavier Bellés, Fausto G. Hegardt 691–699

Disruption of the *Kluyveromyces lactis GGS1* gene causes inability to grow on glucose and fructose and is suppressed by mutations that reduce sugar uptake
Kattie Luyten, Wim De Koning, Ina Tesseur, María C. Ruiz, José Ramos, Philip Cobbaert 701–713

Phosphorylation and activation of human tyrosine hydroxylase *in vitro* by mitogen-activated protein (MAP) kinase and MAP-kinase-activated kinases 1 and 2
Calum Sutherland, Janine Alterio, David G. Campbell, Béatrice Le Bourdellès, Jacques Mallet, Jan Haavik, Philip Cohen 715–722

The phospholipase-A_2 reaction leads to increased monocyte adhesion of endothelial cells via the expression of adhesion molecules
Koutaro Yokote, Nobuhiro Morisaki, Mika Zenibayashi, Shiro Ueda, Tetsuto Kanzaki, Yasushi Saito, Sho Yoshida 723–729

Modulation of tensin and vimentin expression in chick embryo developing cartilage and cultured differentiating chondrocytes
Rinke van de Werken, Massimo Gennari, Sara Tavella, Paola Bet, Francesco Molina, Shin Lin, Ranieri Cancedda, Patrizio Castagnola 781–790

Components of glycine reductase from *Eubacterium acidaminophilum* – Cloning, sequencing and identification of the genes for thioredoxin reductase, thioredoxin and selenoprotein P_A
Meike Lübbers, Jan R. Andreesen 791–798

Comparison of the biochemical properties of unprocessed and processed forms of the small GTP-binding protein, rab6p
Chunzhi Yang, Patrick Mollat, Alain Chaffotte, Mary McCaffrey, Lucien Cabanié, Bruno Goud 1027–1037

Partial purification and properties of enzymes involved in the processing of a chloroplast import protein from *Chlamydomonas reinhardii*
Qingxiang Su, Arminio Boschetti 1039–1047

Mechanism of activation of liver acetyl-CoA carboxylase by cell swelling
Arnaud Baquet, Vinciane Gaussin, Mathieu Bollen, Willy Stalmans, Louis Hue 1083–1089
